

voltammetry using the microband electrode array sensor integrated into a channel.

48. The method of claim 46 wherein the analyte is detected by performing stripping
A2 voltammetry using the microband electrode array sensor integrated into a channel.--

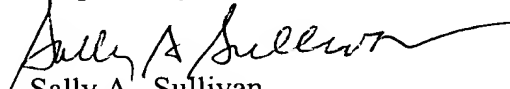

REMARKS

This preliminary amendment cancels claims 1-31 the claims originally filed in the parent U.S. application from which the concurrently filed application takes priority. The amendment adds new claims 32-48 directed to various methods of making and using a microband electrode array sensor.

This amendment does not add new matter to the specification.

This amendment does not require the payment of additional fees. Claims fees have been calculated in the above-referenced divisional application filing based on entrance of this amendment.

Respectfully submitted,

Sally A. Sullivan
